

SAUMIL SHAH

SUMMARY

Hi! I'm Saumil Shah, a Software Engineer with a Bachelor's degree in Computer Engineering. Proficient in JavaScript and Python, I've worked with various technologies. I thrive in collaborative environments, love learning, and I'm always up for new challenges. Currently seeking Software Engineer opportunities to make a meaningful impact in the tech industry.

SKILLS

Frontend - HTML, CSS, Bootstrap, Tailwind, JavaScript, TypeScript, Angular, React

Backend - Python, Django, Flask

Database - My SQL, MongoDB, PostgreSQL

Tools - Git, Jira, Figma, Postman

EXPERIENCE

Capgemini - Software Engineer (DEC 2021 - PRESENT)

- Developed user interfaces and backend functionalities using Angular, JavaScript, Python Django, and other technologies.
- Collaborated closely with UX designers, QA, and backend developers to ensure smooth project execution.
- Led frontend development efforts, overseeing UI design and implementation, while also contributing to backend tasks using Django.
- Actively engaged in continuous learning to stay updated with emerging technologies and industry trends
- Demonstrated effective teamwork and communication skills in a collaborative work environment.

EDUCATION

Gujarat Technological University, Ahmedabad - B.E. In Computer Engineering (2017 - 2021)

PERSONAL PROJECTS (Visit <https://github.com/saumil8200/> for more projects)

Any Post - (Python, Django, SQL, HTML, CSS, JavaScript, Tailwind CSS, Responsive Design)

<https://github.com/saumil8200/AnyPost>

- Developed a Reddit-like web app with user authentication, CRUD operations, and comment threading.
- Integrated password reset and welcome email functionality.
- Designed user account pages for account management.
- Utilized SQL and Django's built-in features for data management.
- Created a responsive UI using HTML, CSS, JavaScript, and Tailwind CSS.

Blog App - (Python, Django, SQL, HTML, CSS, Responsive Design)

<https://github.com/saumil8200/blog-app>

- Created a blog application using Python Django framework for CRUD operations and user authentication.
- Implemented filtering functionality for blog posts based on categories and user preferences.
- Designed a responsive user interface for seamless access to blog features across devices.

Todo - (HTML, Tailwind CSS, Responsive Design, JavaScript, React, Redux Toolkit)

<https://saumil8200.github.io/ToDo/>

- Created a basic Todo app using React, Redux Toolkit, and Tailwind CSS.
- Features include adding, updating, and deleting tasks for a smooth user experience.
- Implemented local storage support for browsers, enabling data persistence across sessions.
- Used Redux Toolkit to manage app data effectively and state management.
- Designed with a responsive layout for easy access on different devices.

Web Dev Projects - (HTML, CSS, Responsive Design, JavaScript)

<https://saumil8200.github.io/Web-Dev-Projects/>

- Here are some web projects I've worked on. They range from small experiments to more complex creations. Take a look to see what I've been up to in web development!

AWARDS

RISING STAR (DEC 2022): Received Rising Star Award For Dec 2022 Month In Insights & Data Department of Capgemini.
